

# BNew™

## BioSpan

B-New Brick Cleaner is formulated to remove excess mortar and concrete from brick, stone, or stucco by softening the material from the in-side out. It may also be used on tile, glass, Formica, and plastic surfaces to remove mineral soil stains. This product is an economical and safer alter-native to mineral acids.

**Typical Uses** Suitable for all brick, stone, stucco, and mortar surfaces

**Packaging** Available in 5-gallon pails and 55-gallon drums

### Key Features

#### Simple Application

One-step spray application is easy and safe

#### Non-Alkaline Formula

Exclusive organic acid system and biodegradable detergents

#### Safe on Metal

Will not etch surfaces or bleach substrate

### Benefits

#### Stain Removal

Can remove stains from concrete and similar surfaces

#### Energy-Free Solution

Requires no heat or additional energy

#### Temperature Resilient

Performs reliably under varying temperature conditions.

### How to Use BNew

Apply BNew liberally to excess mortar, stone, or concrete to be removed. Thoroughly wet and allow for 10 to 15 minutes to penetrate and complete activity. May be rinsed free with ordinary tap water and should not leave unwanted residue.
