

BST CLEANER™

BioSpan

Safe for you, tough on polymers

BioSpan Tech (BST) Cleaner is the ultimate maintenance solution for the BioSpan Spray System. Designed with a powerful yet eco-friendly formula, it effectively removes polymers, latex, and oil-based residues, ensuring your spray system operates at its best.

Typical Uses Flushing the BioSpan Spray System of polymer and product residue. Cleaning latex and oil-based materials from other non-porous surfaces.

Packaging Available in 5-gallon pails and 55-gallon drums

Key Features

Efficient Polymer Removal

Formulated to dissolve and remove latex and oil-based materials from non-porous surfaces.

Protects Your Equipment

Effectively flushes the BioSpan Spray System, clearing nozzles, filters, and hoses to prevent clogs and ensure consistent performance.

Environmentally Safe

Biodegradable and user-safe, making it ideal for routine maintenance

Benefits

Versatile Application

Suitable for cleaning various non-porous surfaces in addition to spray system components.

Clear the Residue

Maintains system efficiency and extends equipment lifespan.

Biodegradable

Safe for users and the environment with a biodegradable formula.

How to Use BST Cleaner

Apply BST Cleaner directly to the surface to be cleaned for polymer removal. Thoroughly wet the surface and allow sufficient time for it to penetrate. When using BST Cleaner to clean a spray unit, remember to flush spray nozzles and all hosing. Reapply to surfaces until all is removed. Rinse with soapy water if desired.
