

 ProTec3600™ BioSpan

Seal, Protect, and Preserve with ProTec!

ProTec3600 is the advanced protective surface coating designed to guard against moisture and stains. With a ready-to-apply formula, ProTec provides effortless application and unmatched durability, making it the perfect choice for preserving your surfaces.

Typical Uses

Perfect for use on concrete, masonry, wood, and other porous or semi-porous surfaces. Suitable for residential, commercial, and industrial settings.

Packaging

Available in 5-gallon pails and 55-gallon drums

Key Features

Superior Moisture Resistance

Shields surfaces from rain, stains, and liquid penetration, ensuring long-lasting protection

Convenient Application

Ready-to-use formula—no dilution or mixing required.

Versatile Protection

Ideal for a variety of surfaces, offering robust defense without compromising appearance.

How to Use ProTec

Make sure surfaces are clean before applying ProTec. Apply directly to the surface by spray, brush, or roller, in an even coating.

Benefits

Long-Lasting Performance

Durable coating that extends the life of treated surfaces while maintaining their aesthetic appeal.

Easy application

spray, brush, or roller—no preparation needed.

Biodegradable

Safe for users and the environment with a biodegradable formula.
